## Armsan has Strengthened its Position on International Area

As Armsan established in 2006, we have initially penetrated our hunting and sporting smooth bore shotguns in the market. As a result of the increasing number of demands coming from our users, we started manufacturing defence and tactical shotguns which made us step into the Defence Industry. The success we achieved in the international tenders showed us that we were on the correct route, hence led us to focus heavily on research and development. Following a steady and significant growth with the endeavours of our research and development department, we have started manufacturing single shot non-lethal smooth grenade launchers that can be used both in civilian and military fields. Last but not the least, we took pleasure in successfully developing modular pump action shotguns which can be applied with infantry rifles.

Defence Industry is considered of utmost importance in our country. With this knowledge in mind, we are dedicated to create a difference in the market by doing benchmarking and close research. We are aiming to meet all the demands from our users by integrating research, development and technology in our own line of products.

As a result of the positive feedbacks we had been receiving about our hunting shotguns, we started our smooth bore tactical and defence lines. Again as a result of feedbacks and demands

coming from our users, we developed the features on our existing guns and started to manufacture and export them. The satisfaction and the new orders we received from foreign countries' tenders which we participated and won, led us to comprehensively branch out in the defence field.

The Defence Industry is progressing in our country just as it is increasing in

the world. As Armsan, we are keeping pace with the expanding market, while satisfying the growing demands. The new regulations in the sector, have created new opportunities and given rise to the competition between the private Turkish companies in the defence sector. Since competition always triggers increase in the quality, this has been a very positive development for our national Defence Industry. Our international prominence is growing in parallel with the improved quality of work that we are performing. We are proud of being a Turkish company that is desired both for its quality and price policies.

Our exports have shown a continuous increase over the years, and we are exporting our shotguns to civilian markets in over forty countries. In the context of military and law enforcement, We already have participated and won approximately ten countries' tenders in America, Europe, Asia and African continents and achieved our deliveries successfully.

The products manufactured by us are made by using hundred percent native capital. In the near future, we are aiming to become one of the leading solution partners for other shotgun manufacturers and countries' military by offering them our 37/38mm, 40 mm, 44mm and 56 mm single shot non-lethal smooth grenade launchers and modular system pump action shotguns.
